

CALL FOR PAPERS

ACM Transactions on Design Automation of Electronic Systems

Editor-in-Chief

X. Sharon Hu, University of Notre Dame, USA

Senior Associate Editors

David Z. Pan, University of Texas at Austin, USA

Joerg Henkel, Karlsruhe Institute of Technology, Germany

Information For Contributors

ACM Transactions on Design Automation of Electronic Systems (TODAES) is a premier ACM journal in design and automation of electronic systems. It publishes innovative work documenting significant research and development advances on the specification, design, analysis, simulation, testing, and evaluation of electronic systems, emphasizing a computer science/engineering orientation. Design automation for machine learning/AI and machine learning/AI for design automation are very much welcomed. Topics include, but are not limited to:

- Architecture- and System-Level Design and Automation
- Circuit- and Logic-Level Design and Automation
- Embedded and Cyber-physical System Design and Automation
- Emerging Technology and Platform based Design and Automation
- Machine Learning for Design Automation and Design Automation for Machine Learning
- Physical Design and Design for Manufacturability
- Reliability, Verification and Test
- Security for Electronic Systems
